

## Overview

The Far North District contains a mix of diverse communities and urban centres, a number of which are located within the coastal environment and/or have identified cultural and historic heritage values. The General Residential zone represents those areas where there is an expectation of higher density residential development, compared to the rural environments, and that generally provides adequacy and capacity of available or programmed development infrastructure.

To support urban sustainability and affordable infrastructure the General Residential zone seeks to consolidate growth where it can around urban centres. The aim is to provide for a variety of housing typologies and sizes that contribute to the vibrancy and viability of those centres, as well as ensuring efficient use of the investment Council makes in infrastructure and services.

In providing for growth over the medium term, and looking out to the longer term, the District Plan provides for a combination of increased density within the existing General Residential zone as well as re-zoning for more intensive residential use in areas where there is adequacy and capacity of available development infrastructure or where it is programmed in the Long Term Plan or 30 Year Infrastructure Strategy.

Council has a responsibility under the RMA, and takes direction from the RPS, to ensure that there is sufficient land available for housing to meet the future demands of the district, that development is in the right location and there is adequacy and capacity of available or programmed development infrastructure.

Objectives	
<b>GRZ-O1</b>	The General Residential zone provides a variety of densities, housing types and lot sizes that respond to: <ul style="list-style-type: none"> <li>a. housing needs and demand;</li> <li>b. the adequacy and capacity of available or programmed development infrastructure;</li> <li>c. the amenity and character of the receiving residential environment; and</li> <li>d. historic heritage.</li> </ul>
<b>GRZ-O2</b>	The General Residential zone consolidates urban residential development around available or programmed development infrastructure to improve the function and resilience of the receiving residential environment while reducing urban sprawl.
<b>GRZ-O3</b>	Non-residential activities contribute to the well-being of the community while complementing the scale, character and amenity of the General Residential zone.
<b>GRZ-O4</b>	Land use and subdivision in the General Residential zone is supported where there is adequacy and capacity of available or programmed development infrastructure.
<b>GRZ-O5</b>	Land use and subdivision in the General Residential zone provides communities with functional and high amenity living environments.
<b>GRZ-O6</b>	Residential communities are resilient to changes in climate and are responsive to changes in sustainable development techniques.

Policies	
<b>GRZ-P1</b>	Enable land use and subdivision in the General Residential zone where: <ul style="list-style-type: none"> <li>a. there is adequacy and capacity of available or programmed development infrastructure to support it; and</li> <li>b. it is consistent with the scale, character and amenity anticipated in the residential environment.</li> </ul>
<b>GRZ-P2</b>	Require all subdivision in the General Residential zone to provide the following reticulated services to the boundary of each lot: <ul style="list-style-type: none"> <li>a. telecommunications:               <ul style="list-style-type: none"> <li>i. fibre where it is available; or</li> <li>ii. copper where fibre is not available;</li> </ul> </li> <li>b. local electricity distribution network; and</li> <li>c. wastewater, potable water and stormwater where they are available.</li> </ul>
<b>GRZ-P3</b>	Enable multi-unit developments within the General Residential zone, including terraced housing and apartments, where there is adequacy and capacity of available or programmed development infrastructure.
<b>GRZ-P4</b>	Enable non-residential activities that: <ul style="list-style-type: none"> <li>a. do not detract from the vitality and viability of the Mixed Use zone;</li> <li>b. support the social and economic well-being of the community;</li> <li>c. are of a residential scale; and</li> <li>d. are consistent with the scale, character and amenity of the General Residential zone.</li> </ul>

<b>GRZ-P5</b>	Provide for retirement villages where they: a. compliment the character and amenity values of the surrounding area; b. contribute to the diverse needs of the community; c. do not adversely affect road safety or the efficiency of the transport network; and d. can be serviced by adequate development infrastructure.
<b>GRZ-P6</b>	Encourage and support the use of on-site water storage to enable sustainable and efficient use of water resources.
<b>GRZ-P7</b>	Encourage energy efficient design and the use of small-scale renewable electricity generation in the construction of residential development.
<b>GRZ-P8</b>	Manage land use and subdivision to address the effects of the activity requiring resource consent, including (but not limited to) consideration of the following matters where relevant to the application: a. consistency with the scale, design, amenity and character of the residential environment; b. the location, scale and design of buildings or structures, potential for shadowing and visual dominance; c. for residential activities: i. provision for outdoor living space; ii. privacy for adjoining sites; iii. access to sunlight; d. for non-residential activities: i. scale and compatibility with residential activities ii. hours of operation e. at zone interfaces, any setbacks, fencing, screening or landscaping required to address potential conflicts; f. the adequacy and capacity of available or programmed development infrastructure to accommodate the proposed activity, including: i. opportunities for low impact design principles ii. ability of the site to address stormwater and soakage; g. managing natural hazards; and h. any historical, spiritual, or cultural association held by tangata whenua, with regard to the matters set out in Policy TW-P6.

## Rules

### Notes:

1. There may be other rules in Part 2- District-Wide Matters of the District Plan that apply to a proposed activity, in addition to the rules in this zone chapter. These District-Wide rules may be more stringent than the rules in this chapter. Ensure that relevant District-Wide Matters chapters are also referred to in addition to this chapter, to determine whether resource consent is required under other rules in the District Plan. Refer to the *how the plan works* chapter to determine the activity status of a proposed activity where resource consent is required under multiple rules.
2. This zone chapter does not contain rules relating to setback to waterbodies for building and structures or setbacks to waterbodies for earthworks and indigenous vegetation clearance. The Natural Character chapter contains rules for activities within wetland, lake and river margins. The Natural Character chapter should be referred to in addition to this zone chapter.
