My submission is:

The zoning of Lot 1001 DP 532487, Kapiro Road, known as Tubbs farm, needs to take full account of the finite, essential natural resource (good quality soil) present at this site.

- A primary purpose of the RMA (s5) is to protect natural resources and safeguard the life-supporting capacity of soil.
- A large part of Lot 1001 has good quality soil (volcanic soil and LUC Class 2 land) – it is one of a few remaining large blocks of Class 2 land in the District.
- Good agricultural soil is a strictly finite natural resource. Less than 3% of the land area in the Far North District is top grade (Class 1&2).
- Retaining good land for agricultural production is essential for feeding ourselves and a growing world population in future decades, and necessary for local jobs and economic well-being.
- Lot 1001 borders the Horticulture zone so it would be logical to include it in the Horticulture zone. Alternatively, Rural Production zoning would also protect the essential natural resource at this site.
- Government reports and studies have concluded that the creation of lifestyle blocks and residential development on good land should be avoided because it fragments land and leads to the permanent loss of productive capability.
- FNDC's submission to MPI on highly productive land in 2019 recognised that: "Kerikeri has converted large areas of horticulture land into residential and rural lifestyle activities over the last 20 years. **Therefore it is vital to protect this remaining finite resource** and other rural land that is highly productive".¹

Residential development on Lot 1001 is inappropriate for many reasons -

- In legal terms, there is no *functional need* for residential development on this particular site. There are alternative sites, on lower quality land, that are much more suitable for residential development.
- The council has not produced an assessment addressing all the long-term costs associated with the loss of good soil/land at this site, taking into account RMA s5, factors identified by MfE and expert reports about adverse effects of fragmentation & loss of productive land.
- Development will create reverse sensitivity effects on lawfully established activities and neighbouring producers.
- Development will generate many other adverse effects - such as residential sprawl in a rural area that lacks appropriate infrastructure; large amount of traffic and safety issues in Landing Road; effects on kiwi & ecological values, water quality, landscape, character and amenity values.

In conclusion: Good soil needs to be zoned for productive agricultural use. The only appropriate zone for Lot 1001 DP 532487 is the Horticulture zone or Rural Production zone.

I seek the following decision from the Council:

S68.001

Zone map amendment: Lot 1001 DP 532487 (known as Tubbs farm) to be re-zoned in Horticulture zone or Rural Production zone, so that good quality soil at the site will be retained for agricultural use.

I **wish** to be heard in support of my submission

If others make a similar submission, I will consider presenting a **joint case** with them at a hearing
