
Appendix 4 – Officers Recommended Amendments to the Settlement Chapter

Note the below provisions represent the Section 42A Report Writing Officer's recommended amendments to the provisions of the Proposed District Plan, in response to submissions (with underline used for new text and ~~strikethrough~~ for deleted text). Recommendations made through the Reporting Officer's right of reply are shown in red underline for new text and ~~red strikethrough~~ for deleted text.

Overview

The district has a large number of small rural and coastal settlements. The National Planning Standards have identified the Settlement zone as being appropriate for 'areas used predominantly for a cluster of residential, commercial, light industrial and/or community activities that are located in rural areas or the coastal environment. This definition applies to settlements of varying sizes and mixes of activities, including larger settlements such as Okaihau through to smaller settlements such as Jacks Bay.

A defining feature of settlements in the Settlement zone is that they are neither supported, nor plan to be supported, by a Council reticulated wastewater network. In addition, most settlements do not have reticulated water supply and are not connected to a reticulated stormwater network. It is expected that these settlements will have limited development potential due to this lack of infrastructure as the need to provide most, if not all, services on-site will prevent urban scale intensification. The character and amenity values of each settlement differs depending on its location, the range of activities in the settlement and the role of the settlement in servicing the surrounding area. It is expected that the individual characteristics of each settlement will be recognised in the preparation and assessment of any resource consent application. Most of the settlements are located in a rural setting adjoining the Rural Production zone, which means reverse sensitivity effects also need to be managed at this interface.

Larger settlements provide commercial, community and industrial services for the surrounding rural community and the travelling public. These non-residential activities are usually small scale such as schools, medical centers, halls, marae, food outlets and service stations. They play a major role in the community such as providing a source of employment, education healthcare and as social meeting places.

Some settlements are located in the coastal environment and only support a cluster of residential activities, which may have small to medium scale visitor accommodation (such as camping grounds, motor camps and holiday rental homes) and also recreational facilities. Due to their coastal location some of these settlements have small resident populations that rise substantially over summer months with the influx of holidaymakers.

There are settlements such as Te Tii where the land tenure is predominantly Māori land, as defined in Te Ture Whenua Māori Act 1993. The majority of the land in these settlements will be zoned Māori Purpose zone, however residual land in the settlement that is in general title and therefore not eligible to have the Māori Purpose zone applied has been zoned Settlement zone. This ensures that all land in a settlement has an appropriate development framework, regardless of land tenure.

Council has a responsibility under the RMA, the NPS-UD and the Northland Regional Policy Statement to ensure that there is sufficient land, integrated with infrastructure networks, for housing and business to meet the expected demands of the district. If land in the Settlement zone is connected to a Council reticulated wastewater network system in the future, then a plan change will be undertaken at that time to determine if the settlement should be rezoned as an urban

environment.

Objectives	
RSZ-O1	Rural and coastal settlements are used predominantly for residential activities and are sustained by a range of compatible activities and services.
RSZ-O2	Land use and subdivision is of a scale and intensity that is in keeping with the rural or coastal character and amenity <u>values</u> of each settlement.
RSZ-O3	Land use and subdivision in the Settlement zone is appropriate for the physical and environmental attributes of the site and any infrastructure constraints.
RSZ-O4	Land use and subdivision in the Settlement zone is managed to control any reverse sensitivity issues that may occur within the zone or at the zone interface.
Policies	
RSZ-P1	Enable residential and complementary non-residential activities that support the role and function of the Settlement zone.
RSZ-P2	Require land use and subdivision in the Settlement zone associated with non-residential activities to demonstrate the ability to provide for onsite infrastructure unless a reticulated service is available.
RSZ-P3	Enable non-residential activities in the Settlement zone that: <ul style="list-style-type: none"> a. are of a scale, intensity, <u>and</u> character <u>and amenity</u> that compliments the residential activities <u>and amenity values</u> in the settlement; b. support the social and economic well-being of the community; c. do not adversely affect the viability and vitality of nearby urban centers; and d. demonstrate the ability to provide for onsite infrastructure.
RSZ-P4	Avoid land use and development in the Settlement zone that results in reverse sensitivity effects either within the zone or on activities adjacent zones.
RSZ-P5	Manage land use and subdivision to address the effects of the activity requiring resource consent, including (but not limited to) consideration of the following matters where relevant to the application Consider the following matters where relevant when assessing and managing the effects of land use and subdivision in the Settlement Zone ¹ : <ul style="list-style-type: none"> a. the scale, character and amenity <u>values</u> of the settlement, in particular impacts on existing residential activities; b. siting and design; c. cultural and social well-being, including health and safety; d. potential reverse sensitivity effects both within the settlement and on adjacent zones <u>and the rail designation boundary</u>; e. its location within or adjoining to the settlement; and f. the vitality and viability of nearby urban environments. g. the capacity of the site to cater for on-site infrastructure associated with the proposed activity; h. the adequacy of roading infrastructure to service the proposed activity; i. managing natural hazards; j. any adverse effects on areas with historic heritage and cultural values, natural features and landscapes, natural character or indigenous biodiversity values; and k. any historical, spiritual, or cultural association held by tangata whenua, with regard to the matters set out in Policy TW-P6.

¹ Consequential amendment, clause 10(2)(b), Schedule 1, RMA

Rules

Notes:

1. There may be other rules in Part 2-District-wide Matters of the District Plan that apply to a proposed activity, in addition to the rules in this zone chapter. These District-wide rules may be more stringent than the other rules in this chapter. Ensure that relevant District-wide chapters are also referred to in addition to this chapter, to determine whether resource consent is required under other rules in the District Plan. Refer to the *how the plan works* chapter to determine the activity status of a proposed activity where resource consent is required under multiple rules.
2. This zone chapter does not contain rules relating to setback to waterbodies and MHWS for building and structures or setbacks to waterbodies and MHWS for earthworks and indigenous vegetation clearance. The Natural Character chapter² contains rules for activities within wetland, lake and river margins and the Coastal Environment chapter contains rules for activities within the coastal environment. The Natural Character chapter and the Coastal Environment chapter³ should be referred to in addition to this zone chapter.
3. The objectives and policies of the Mineral Extraction Zone should be considered in addition to the objectives and policies of the Settlement Zone for any consent application for a mineral extraction activity⁴.
4. None of the rules in the table below apply to activities that are regulated under the Resource Management (National Environmental Standards for Commercial Forestry) Regulations 2017⁵.

RSZ-R1	New buildings or structures, <u>relocated buildings⁶</u> or extensions or alterations to existing buildings or structures	
Settlement zone	<p>Activity status: Permitted</p> <p>Where:</p> <p>PER-1 The new building or structure, <u>relocated building</u> or extension or alteration to an existing building or structure, will accommodate a permitted, <u>controlled or restricted discretionary⁷</u> activity.</p> <p>PER-2 The new building or structure, <u>relocated building</u> or extension or alteration to an existing building or structure complies with standards: RSZ S1 Maximum height; RSZ S2 Height in relation to boundary; RSZ S3 Setback (excluding from MHWS or wetland, lake and river margins); RSZ S4 Setback from MHWS;</p>	<p>Activity status where compliance not achieved with PER-2: Restricted Discretionary</p> <p>Matters of discretion are restricted to:</p> <p style="padding-left: 20px;">a. the matters of discretion of any infringed standard</p> <p>Activity status where compliance not achieved with PER-1: Discretionary</p>
