**My submission is:**

The zoning of Lot 1001 DP 532487, Kapiro Road, known as Tubbs farm, needs to take full account of the finite valuable natural resource (good quality soil) present at this site.

- A primary purpose of the RMA (s5) is to protect natural resources and safeguard the life-supporting capacity of soil.
- A large part of Lot 1001 has good quality soil (volcanic soil and LUC Class 2 land) – it is one of the few remaining large blocks of Class 2 land in the District.
- Good agricultural soil is a strictly finite natural resource. Less than 3% of the land area in the Far North District is top grade (Class 1&2).
- Retaining good land for agricultural production is essential for feeding ourselves and a growing world population in future decades, and necessary for local jobs and economic well-being.
- Lot 1001 borders the Horticulture zone so it would be logical to include it in the Horticulture zone. Or alternatively, Rural Production zone would also protect the natural resource at the site.
- Government reports have concluded that creating lifestyle blocks and residential development on good land is a national problem. Studies concluded that even lifestyle blocks are a major problem in practice - they fragment land and lead to the permanent loss of productive capability.
- FNDC's submission to MPI on highly productive land in 2019 stated that: "Kerikeri has converted large areas of horticulture land into residential and rural lifestyle activities over the last 20 years. Therefore it is vital to protect this remaining finite resource and other rural land that is highly productive".

Residential development on Lot 1001 is inappropriate for many reasons -

- In legal terms, there is no *functional need* for residential development on this particular site. There are alternative sites on lower quality land that's more suitable for residential development.
- The council has not produced an assessment addressing all the long-term costs associated with the loss of good soil/land at this site, taking into account factors identified by MfE and expert reports about adverse effects of fragmentation & loss of productive land.
- Development will create reverse sensitivity effects on lawfully established activities and neighbouring producers.
- Development will generate many other adverse effects - such as residential sprawl in a rural area that lacks appropriate infrastructure; large amount of traffic in Landing Road and Kapiro Road; effects on kiwi & ecological values, water quality, landscape, character and amenity values.

In conclusion: Good soil needs to be zoned for productive agricultural use. The only appropriate zones for the farmland at Lot 1001 DP 532487 are Horticulture zone or Rural Production zone.

I seek the following decision from the Council:

**S181.001**

Zone map amendment: Lot 1001 DP 532487 (known as Tubbs farm) to be re-zoned in Horticulture zone or Rural Production zone, so that good quality soil at the site will be retained for agricultural use.

Hi Craig,

Thank you for your submission (as attached) that was received prior to the closing date for submissions.

We've undertaken an initial review of your submission and note that there's some information gaps where council requires further detail, in particular a statement relating to trade competition.

If you could either amend the attached and email back to me please, or provide a response to this email confirming that you (the submitter) could/could not gain an advantage in trade competition through the submission, whichever is easiest for you.

Once we've received the necessary information, we'll include it as part of your submission and retain a written record of this correspondence.

We look forward to your response. Please don't hesitate to contact me if there are any matters you'd like to discuss.

Kind regards
